

Kirisun PT578 VHF/UHF Portable Radio

[Functions](#) [Specifications](#) [Accessories](#) [Download Brochure](#) [Download Software](#)

- **CTCSS/DCS:**
50 groups of standard CTCSS and 83 groups DCS are available (PC Programmable). Built-In CTCSS/DCS Encoder/Decoder can prevent co-channel interference and unwanted conversations on the same frequency and ensure smooth communication.
- **5 Tone:**
Built in 5 Tone signaling for Caller ID
- **Channel Scan:**
The radio could continuously scan each channel in the scan list for active conversation. Simply press a preset key to activate scan. Priority scan and talk channel (revert channel) could be set to.
- **Password Protection:**
The radio offers reading and writing password to protect the privacy and prevent unauthorized modification of radio data.
- **(FCS) Free Channel Scan:**
Automatically looking for communication channel.
- **16 Channels:**
Up to 16 channels could be programmed for conversation, providing flexible channel assignments among different user groups.
- **Programmable:**
With the programming cable, the parameters on radio could be configured by programming software.
- **Squelch Level Programmable:**
Squelch reduces background noise and improves sound quality. Adjustable squelch level makes the radio widely used in various environments.
- **Low Battery Alert:**
When the battery power is low, the LED indicator flashes red, reminding user to recharge or replace the battery.
- **IP65 Rated:**
