

PREDATOR BUDGET BASE ANTENNAS

The predator range of antennas is a very versatile range of base station antennas for use in alarm systems or temporary installations. The antenna does not require any ground plane or steel structure to be mounted to and can ideally be mounted to masonry, steel, wood or any other mounting structure such as steel or plastic poles.

REF ORDER CODE	GAIN IN dBi	FREQ. IN MHz.	VSWR @ RES.	POWER IN WATT	IMP. IN OHM	BAND WIDTH @ 1.5:1	WEIGHT IN Kg.	TERMINATION	TOTAL LENGTH IN MET.
PR-27	UNITY	26 - 28	<1.5:1	100	50			5 Met. RG58 no Connector	
PR-29	UNITY	29 - 30	<1.5:1	100	50			5 Met. RG58 no Connector	
PR-40	UNITY	35 - 45	<1.5:1	100	50			5 Met. RG58 no Connector
